

Informatii despre Microban®

Microban este o marca renumita in protectia antibacteriana.

Protectia antibacteriana realizata de Microban:

- asigura produselor un nivel suplimentar de protectie impotriva pericolelor reprezentate de microbi, bacterii, ciuperci si mucegaiuri care pot cauza contaminari incrucisate si deteriorarea produselor
- stampilele au fost supuse unor teste de laborator extinse si au o lunga istorie de utilizare in conditii de siguranta. Aditivii Microban se pot gasi in multe produse destinate consumatorului final, in produse industriale sau medicale din intreaga lume.
- sunt impregnate in timpul procesului de productie si nu se pot spala sau elimina in nicio circumstanta. Sunt proiectate sa asigure protectia antibacteriana pe tot timpul de viata al produsului. COLOP foloseste Microban 3G Silver™ deoarece, de foarte mult timp, se stie ca argintul este recunoscut pentru proprietatile sale anti-bacteriene.

Testele de laborator au aratat ca produsele COLOP Microban® asigura o protectie efectiva impotriva bacteriilor periculoase precum E. coli, MRSA si Salmonella, de pana la 99.9%.

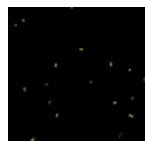

Microban® Classic Line

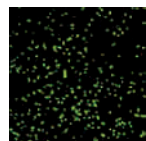

Tehnologia de protectie antibacteriana Microban consta intr-o substanta incorporata in manerele si capacele stampilelor COLOP Classic Line.

MICROBAN

The Spirit of Innovation

COLOP® si Microban® – fac o buna echipa impreuna! Stampile cu protectie antibacteriana

In viata de zi cu zi stampilele sunt utilizate de mai multe persoane simultan – asta inseamna ca pot deveni foarte usor surse de imbolnavire.

Tehnologia de protectie de tip Microban® inhiba procesul de multiplicare a bacteriilor asigurand o protectie corespunzatoare.

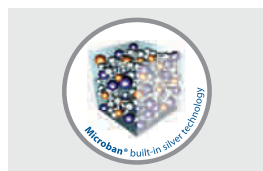

Principalele zone de contact care au incluse in compositie protectia antibacteriana Microban® sunt:

Classic Line:
maner si capac

Printer Line:
maner si fereastră de personalizare

Pocket Stamp Plus:
principalele puncte de contact

COLOP utilizeaza tehnologia Microban 3G Silver™

COLOP participa in mod regulat la Programul de Asigurare a Calitatii Microban
