Waste material

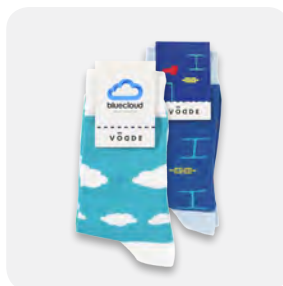

Waste as a basis for new business gifts

Waste from consumer items used to produce promotional products falls under the broader category of recycling and upcycling. This includes waste such as coffee grounds, apple peels, used milk cartons and empty wine bottles. This waste can be thrown away or burned, but it can also be reused and processed as a raw material in new products. It seems too good to be true, but that's exactly what has been done with a selection of promotional products in this catalogue. Examples of promotional products made from recycled waste include bags, pens and notebooks. Using waste materials to produce promotional products is a positive step towards waste reduction. It helps reduce waste and promotes a circular economy in which materials are continuously reused and recycled and waste is seen as a valuable resource rather than a problem.

Recycled material

A second life for used products

We are all familiar with PET bottles and know that these bottles pollute the oceans and landfills considerably. That is why these bottles are collected and recycled to serve as raw material for many products. This applies not only to bottles but also to other plastics. The material made from this is RPET. Many more materials are recycled and then given a second life. In this way, old clothing and textiles in combination with RPET become the basis for RPET felt. You will find bags made of this material in our collection, among other things. Recycled cotton is ideal for making textiles such as towels. The use of recycled material in promotional products contributes to the promotion of sustainability. These products will help to communicate that you make conscious choices and are looking after the environment.

Natural material

The power of natural materials

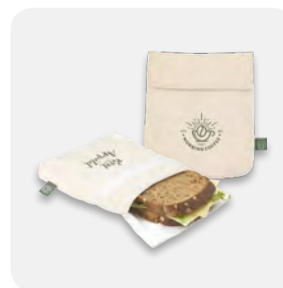

Natural and bio-based materials have gained popularity in the production of promotional products in recent years. They are increasingly used as sustainable alternatives to traditional plastics and petrochemical raw materials that are not renewable. Products made from natural materials have become a favourite option for many. They look and feel great. Some examples are organic cotton, sustainable bamboo, stylish cork and durable jute. You can find them in bags, cutting boards and kitchen accessories. In addition, there are promotional products made from 'biobased' material; renewable raw materials such as starch, sugars, cellulose, lactic acid, proteins and micro-organisms. This also includes agricultural and organic waste such as the remains of the harvest of corn or sugarcane. You will find numerous products in our collection that are made from these materials, including pens, bags and drinking bottles. Get ready to be surprised by the power and appearance of these eye-catching natural promotional products.

Circular&Co. - the power of circular design

The circular drinkware from the Circular&Co brand is made from recycled 'single-use' (coffee) cups and/or old PET bottles. In this collection, you will find reusable products with a unique design: from leak-proof water bottles with a push-click lid and 360-degree drinking experience to circular, stackable returnable cups, the perfect alternative to disposable coffee cups. With your logo printed on them, these make the ultimate drinkware and perfect eye-catchers for on the road, at home or at work. With these striking products, Circular&Co contributes to a sustainable solution for global waste.

W126

Circular&Co Recycled Now Cup 340 ml

Double-walled, circular reusable coffee-to-go cup with lid. A product of the brand Circular&Co. The outer insulating layer of this cup is made of used single-use coffee cups. With inner wall and lid with drinking hole made of PP. The Now Cup is insulated, keeping your hands cool and your coffee or tea hot. Food Safe, BPA-free and melamine-free. 100% recyclable. Capacity 340 ml. Made in the UK. Meas. Ø 6,4 x 13,3 cm. 130 g.

W043

Circular&Co Recycled Coffee Cup 227 ml

Double-walled, circular reusable coffee-to-go cup with lid from Circular&Co. The outer insulating layer of this cup is made from used, recycled single-use paper coffee cups. With inner wall and lid made of PP. 100% leak free. The insulating effect keeps your hot drink hotter and cold drink colder for longer. The lid is designed with patented 360-degree technology, which allows you to sip from any angle. The coffee cup can be opened and closed with one hand and one click. Ideal for on the go. Food Safe, BPA-free and Melamine-free. 100% recyclable. Capacity 227 ml. Meas. Ø 8,5 x 13 cm. 183 g.

Returnable Cups - Stackable, reusable coffee cups from Circular&Co.

Sustainable, reusable coffee cup from the Circular&Co brand. Made of 100% recyclable, sturdy PP. The perfect alternative to the disposable coffee cup.

This stackable cup not only looks attractive, the design also puts the focus on functionality. The ribs disperse the heat of the drink and provide a comfortable grip. In addition, the cup has a quick-dry base. Excellent to use as a standard reusable cup at the coffee machine. The perfect alternative to the disposable coffee cup.

This circular returnable cup lasts more than 500 wash cycles and is recyclable up to 6 times. After only 2 uses, the CO₂ emissions of the coffee cup are offset compared to a single-use alternative. This means huge amounts of CO₂ never reach our atmosphere. By switching to a reusable cup, billions fewer cups will end up in the waste. This beautiful cup is Food Safe, BPA-free and Melamine-free.

Coffee Mug On The Go 250 ml

This double-walled, thermos, coffee-to-go cup is made from coffee grounds and sugar cane waste. This durable cup has a screw-top lid with drinking opening and an integrated closure to prevent unwanted leaks. The inner wall and lid with snap closure are made from a compostable material called polylactide (PLA). This cup keeps your coffee at the right temperature and is perfect for when you are out and about. Reusable, BPA Free and Food Approved. Capacity 250 ml. Meas. Ø 9 x 12,5 cm. Each item is supplied in an individual brown cardboard box. 160 g.

.44

W078

Bamboo Cup

Reusable cup made from 100% natural bamboo. Contains no additional materials. Can be used for tea and coffee, but also great as a bowl for snacks. The cup is made by hand from a bamboo stem making each one unique. The size varies with each cup. 100% Food Safe. Meas. Ø 8 x 8 cm. Each item is supplied in an individual brown cardboard box. 150 g.

.41

W131

PLA Cork Cup 350 ml

Natural and reusable coffee-to-go cup, made from cork. The inside of the cup is made of compostable PLA: made of corn starch produced by plants. Both materials are both biodegradable and renewable. Keeps your drink warm for hours. The perfect combination of design, functionality and sustainability. Not dishwasher safe. Capacity 350 ml. Meas. Ø 9,5 x 15 cm. Each item is supplied in an individual brown cardboard box. 200 g.

Recycled stainless steel

A strong choice with impact

Recycled stainless steel (SS) is stainless steel made from recycled metals, usually from old stainless-steel products, such as kitchenware and appliances.

Recycled stainless steel helps reduce the demand for new raw materials, leading to less mining and less energy waste. The use of recycled stainless steel in promotional products also offers practical benefits, such as sustainability and the ability to be reused.

Products made from recycled stainless steel are just as durable, hygienic and resistant to corrosion as those made from virgin stainless steel, but they are a greener choice for both consumers and the planet.

Sugar cane waste

A bio-based raw material for promotional gifts

Sugarcane is a crop that belongs to the grass family. After the harvest of sugar cane and the production of sugars, leaves and stems remain as a residual product. Instead of incinerating this waste, it now serves as a raw material for sustainable and environmentally friendly products. The raw material for this is called bio-plastic. Sugar cane is a fast-growing crop that removes CO₂ from the air during growth and is highly resistant to disease and drought. This means that fewer resources are needed to keep the plant alive. Choosing bio-based promotional products that contain sugar cane waste, means that you are choosing a green solution!!

KYWIE Wine Cooler Suede

This wine cooler from the KYWIE® brand is handmade from 100% natural Texel sheepskin. This cooler keeps your bottle of wine or champagne at a consistently cool temperature. Better than any other material except ice. The fine wool interior is a natural bio-insulation and retains (cold) air in the cooler. A pre-chilled bottle of wine will stay cold for up to 4 hours. This special wine cooler is light and easy to store, protects the bottle and makes pouring easy. In addition, this material is dirt-repellent. Suitable for 0.7-litre wine bottles and 1-litre water bottles. Handy for at home and on the road, in summer and winter. Dutch design. Made in Holland. Per piece in a cotton pouch.

Meas. Ø 10 x 23 cm. 150 g.

6881

VÖDDE

Sustainable socks won't change the world, it's the people who wear them that will...

The Dutch company Vodde, reuses discarded textiles to make new products. Vodde makes its yarn from cotton collected by local 'rag farmers' and from cutting waste from textile production in European countries where Vodde makes its own products. In addition, polyesters derived from PET bottles, nylon, fishing nets and other collected waste are also used.

These socks use a 100% circular economy manufacturing process. By wearing these socks you are contributing to a sustainable world with less pollution.

These socks are available made-to-measure and also with a customised design. Choose from nine standard yarn colours. All Vodde socks are supplied as standard in pairs with a label, or optionally in a box made from sustainable grass cardboard, which can be printed with your own logo. This way you can design your own socks that perfectly match any corporate identity. Developed and tested in the Netherlands, produced in the EU.

Corn waste

An organically responsible promotion

Corn is a fast-growing crop. After harvesting the primary crop, maize, leaves and stems remain as a residual product. Historically, this waste product would have been incinerated. With new production methods, this waste is now used as a raw material for sustainable and environmentally friendly products. The starch from the fast-growing maize plant serves as the basis for bio-plastic, also known as PLA. It is 100% biodegradable, 100% industrially compostable and CO2 neutral. With products that basically consist of corn, you are investing in a strong eco-gift.

.04

W095

Corn Poncho

Reusable poncho made from waste from corn production: 4% PLA, 60% PBAT and 36% cornstarch. This poncho is much more durable in production than plastic ponchos. In addition, this material is also 100% biodegradable and 100% compostable. Packed in a slip sleeve of the same material. Meas. 14 x 1 x 10 cm. 70 g.

MADE[®]
out of

Recycled leather: from waste to luxury leather products

This recycled leather is made out of recycled leather waste from shoe and bag productions in Italy. The waste product is collected, ground and re-bound with water and natural binders. This material is then given a new purpose in the form of a new product in the MADE out of collection. These products are provided with a coloured top layer, made from a thin 100% water-based PU layer. The materials are largely provided with the GRS certificate. Experience the feeling of luxury and comfort of these unique products with a limited ecological footprint.

Hemp

Hemp fibres are an extremely strong basis for sustainable bags

The hemp plant has the strongest available natural fibres and almost all parts of the plant can be used. For example, the hemp plant has been consciously cultivated for centuries to make textiles. Hemp is a very fast and easy growing plant and is naturally resistant to insects. It can therefore be grown completely organically. Hemp uses less 25-35% less water than the cotton plant and also has a smart root system. The deep, fine roots of the hemp plant keeps the soil healthy and purifies toxic substances from the soil.

RETULP

.90

W382

Retulp Fridgebag Lunchbag

Striking, sustainable lunch bag from the Retulp brand. Made from the material of discarded refrigerators. Equipped with an insulated inside to keep the contents at the correct temperature. With a velcro closure for convenient reuse making it is easily removable to clean with a damp cloth. This bag has the perfect size for a nice lunch and is a great replacement for daily plastic sandwich bags. This is the perfect solution to eliminate single-use plastics. Equipped with a care label with QR code where you can see the environmental report of this bag. This is literally a bag with a sustainable and transparent story! Capacity approx. 9 litres. Meas. 23 x 14 x 29 cm. 32 g.

Jute

The force of nature

Naturally tough

Jute is a long, soft, plant-based fibre that can be spun into rough, strong threads and is 100% biodegradable. Very little fertilizer and pesticides are used for the cultivation of jute, making it a sustainable alternative to cotton and nylon. Jute gives products a tough and robust appearance. It is a strong and wear-resistant material, extremely suitable as a basis for making shopping bags. These products can be printed with a logo, but due to the coarse weave, the printing of small details, thin lines and small letters is limited.

Durable in every way

Ecowings make bags and accessories from truck inner tubes. Removing discarded inner tubes from the waste stream and upcycling them into high-quality products prevents the rubber from being burned and released into the atmosphere. Ecowings bags are durable and stylish with each one being unique.

Skilled craftsmen together with a local team in India make up the Ecowings company, designing and manufacturing bags by hand. In the Indore region, people of all classes are offered employment for fair compensation in a clean and safe working environment.

Ecowings contributes to a greener lifestyle, promotes upcycling and recycling and supports communities in India.

W362

Ecowings Funky Falcon Backpack

Backpack from the Ecowings brand. This cool backpack is made by hand from robust car inner tubes and recycled PET bottles. Supplied with a spacious main compartment and separate laptop storage for a laptop up to 17 inches in size. The front zip pocket offers space for small items that you would like to have at hand. Features include adjustable shoulder straps, a hanging loop, a padded handle and tough, waterproof zips with distinctive zip pulls. Fully lined. The foam reinforcement protects your laptop from damage and guarantees extra comfort when carrying it. All support material is made from recycled RPET.

Due to the unique character of each inner tube, each bag is also unique. No two bags are identical. A beautiful, stylish and durable product that will last for years. Washable, waterproof and Peta Approved Vegan (an animal-friendly alternative to leather). Capacity approx. 27 litres. Meas. 32 x 10 x 40 cm. 700 g.

Working towards a world without textile waste

At Wolkat, mainly Dutch, discarded textiles are turned into new, usable raw materials. Wolkat is the only textile processor in the world with a fully circular process. Collected textiles are pre-sorted in the Netherlands. In Morocco, textiles are further sorted, washed, cut and ultimately spun into yarns from which strikingly beautiful fabrics are woven. This recycled textile is then used to make promotional products.

Wolkat consciously chooses to process in Morocco. There is a lot of knowledge in this country and Tangier is well known as both a textile and port city. This means that the required infrastructure is in place. Many people work in this industry. Their income allows them to provide for their families and actively participate in the economy.

Complete the circle and choose Wolkat.

1214

Vegan apple leather: with the luxurious look of real leather

Vegan apple leather is a plant-based alternative to leather. It is created during a special process. 1.4 kilos of apples are needed to make 1 litre of apple juice. After the juicing process, the skin, core and pulp remain. This waste product is dried and ground and then made into apple leather with a mix of PU, polyester and cotton. This innovative process is both sustainable and vegan. Apple leather originates from Italy. In the Netherlands, as part of a social apprenticeship company, beautiful products are made from apple leather. The result? Surprisingly stylish promotional gifts with the look & feel of genuine leather.

Combi Organic Shopper (160 g/m²)

Sturdy ECO shopping bag made from 100% organic cotton (160 g/m²) combined with tough jute. With long handles. Capacity approx. 8 litres. Meas. 36 x 44 cm. 96 g.

.42

Organic cotton

The soft refinement of natural textiles

Cotton is breathable, light and relatively inexpensive. Unlike cotton, organic cotton is grown without fertilizers and the use of synthetic pesticides. In addition, much less water is used for cultivation. As a result, the cotton plant grows slowly and makes strong fibres from which beautiful and strong fabrics are made. Organic cotton is less harmful to humans, animals and the environment, making it a more environmentally friendly alternative to cotton. A responsible choice for propagating a promotional message.

Our organic cotton products, have a GOTS certification. GOTS guarantees the biological status of textiles from the harvest of the raw materials to the ecologically and socially responsible production and labelling. Everything is aimed at offering the consumer a reliable guarantee of the production process. GOTS certification takes in to consideration the processing, production, packaging, labelling, trade and distribution of all types of textiles consisting of at least 70 percent certified organic, natural fibres.

Leaf It Bag

Recycled paper bags with character

These multifunction bags are made from recycled paper and can be used for all kinds of promotional purposes. They have a folded bottom and a side gusset. They are supplied with comfortable handles matching the material of the bag. The use of natural and recycled materials makes each bag unique in appearance, no two bags are the same.

Choose from three different types of material: recycled straw fibres, grass paper and recycled jeans fibres.

Available in different models and sizes, with enough space for a logo or brand imprint.

No trees are cut down for the production of these bags.

Recycled ABS

The popularity of recycled ABS

Recycled ABS is a material produced by collecting and processing used ABS plastic products. ABS is found in products such as toys, electronics and car parts. Recycled ABS is produced by sorting and cleaning used ABS products, melting them and transforming them into new products. The use of recycled ABS in promotional products contributes to the reduction of waste and contributes to a circular economy. It is a versatile material that can be used for a wide range of promotional products.

Suono Recycled ABS Wireless Speaker

Wireless Bluetooth speaker with a casing made from recycled ABS and RPET plastic. With Bluetooth version 5.1 and 5W of power, this speaker produces a clear and powerful sound. The built-in 1200mAh lithium battery, once charged, guarantees a playing time of up to 6 hours (at a volume of 75%). Wireless range up to 10 meters. Power 300mAh/3.7V. Easy to operate and compatible with the most common smartphones and tablets. Includes USB-C Recycled TPE charging cable and a user manual. Meas. Ø 8,6 x 7,5 cm. Each item is supplied in an individual brown cardboard box. 230 g.

FSC®-certified Bamboo

A natural promotion with style

Environmentally friendly FSC-certified bamboo comes from sustainably managed bamboo plantations. Bamboo is a fast-growing plant and can mature within a few years, meaning it is a renewable and sustainable resource. The natural, warm appearance and beautiful grain structure make bamboo products very popular. Products made from FSC-certified bamboo are ideal for promotional purposes due to their environmental friendliness, aesthetic appeal, sustainability and the positive message they convey.

Recycled Textile Refillable Notebook A5

A5 notebook from the MADE out of brand. This notebook has a cover made from leftovers from other recycled textile productions: 70% denim waste, 25% binders and 5% vegetable additives. This notebook with elastic closure has a loose, removable, refillable pad (Reuse & Reduce) consisting of approx. 120 sheets/240 pages of lined, recycled, FSC-certified paper. This paper is produced using a CO2-neutral process. The pad is held in place with a sturdy elastic band. The cover has a fine, modern-looking structure. Fine fibres make the flexible cover material comparable to real leather. It is 100% recyclable and can be reused repeatedly. Due to the use of old denim, the cover has a blue colour. A recyclable product with a contemporary look. Handmade. Dutch design. Made in Holland. Meas. 22 x 18 x 1 cm. 337 g.

3889

Felty GRS RPET Notebook A5

Durable A5 notebook with removable cover made of GRS-certified RPET felt. The beautiful cover has a handy pen loop and a closing elastic. Seed Paper Bookmark

Bookmark made from seed paper. A mix of flower seeds is glued between two layers of recycled paper (40 g/m²). Simply tear the biodegradable paper into pieces, plant it in some soil and water. The seeds will grow into flowers or herbs. A great way to lend nature a hand. Including full colour imprint on one side. This product cannot be printed on the entire surface because the ink prevents the seeds from germinating. Meas. 21 x 6 cm. 2 g.

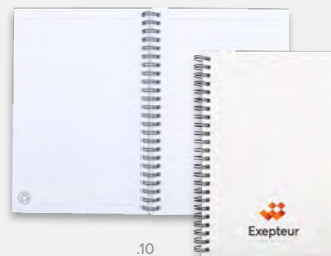

.11

1496

made in
Europe

Seed Paper Sticky Notes

Memo pad with soft cover made of seed paper and 50 sticky notes made of grass paper. This paper is made from grass fibres (up to 40% content) and forest materials. Grass Paper is an environmentally friendly and sustainable product due to the significantly reduced water and energy consumption required compared to using only virgin fibres. When you have used all 50 sheets of paper, you can plant the seed paper cover of the memo pad in soil. After watering, the seeds will germinate and the paper will grow in to flowers. A fantastic green and sustainable office product. Made in Europe. Meas. 7,2 x 0,6 x 10 cm. 41 g.

.10

W100

Seed Paper Notebook A5

Notebook in A5 format with approx. 80 sheets/160 pages lined paper (70 g/m²). The cover of this notebook is made from so-called seed paper with flower seeds. This kind of paper is biodegradable and ecologically friendly, made by hand from recycled materials rather than from trees. The seeds are then embedded into the paper. If you plant the paper in the soil, the paper perishes, the seeds grow, and you are left with beautiful flowers. Meas. 14 x 2 x 21 cm. Each item is supplied in an individual brown cardboard box. 180 g.

Durable notebook in A5 format. With ca. 32 sheets/64 pages of lined paper (80 g/m²). The paper-free softcover is made from agricultural and organic waste such as tomatoes, peppers, plants and onions. This waste is mixed with recycled paper from Europe. A handy and eco-friendly notebook for taking notes and writing down ideas. Meas. 16,5 x 1 x 22,5 cm. 123 g.

Coffee waste

Boost your brand with coffee grounds

In the Netherlands alone, more than 250 million kilograms of coffee grounds are left over after making coffee. Historically, most of this waste ended up in an incinerator. Now, these coffee grounds are being used as the perfect raw material for making a sustainable alternative to plastic. Coffee grounds are now collected from cafes and restaurants and dried at special locations ready to be used again. Once processed, the coffee grounds form the basis for the production of useful products such as pens, flower pots and sunglasses.

Coffee Notebook Wire-O A5

A5 notebook with a cover made from coffee grounds, it even smells like coffee! Coffee grounds remain after brewing and are then used to create this product. Coffee grounds are an organic material and are naturally biodegradable. This notebook is ideal for taking notes during important meetings and business lunches. The handy wire-o-binding allows the pages to be completely turned. This makes it easier to write without the book closing all the time. The 80 sheets/160 pages of lined paper (80 g/m²) in this notebook are 100% recycled, meaning no deforestation has taken place to create this notebook. Meas. 20 x 14 x 0,8 cm. 214 g.

Vegan imitation leather

From fruit scraps to vegan imitation leather

The peels and remains of fruits and vegetables, and unsellable produce, often find their way into the trash. But nowadays this waste is separated from other organic waste and used to produce pulp. This pulp is enriched with various supplements and then spread evenly on metal plates for drying in a special oven. The result? Supple sheets of vegan imitation leather, which are then provided with a beautiful finish. After drying, a soft and attractive material is created that consists partly of fruit remains and partly of PU (polyurethane). This vegan imitation leather is virtually indistinguishable from real leather and is used, among other things, to produce various promotional products.

5127

Pineapple FSC Notebook

A5 notebook with a hard cover made of pineapple imitation leather. This material is made with 30% recycled pineapple components. The beautiful vegan imitation leather is indistinguishable from real leather. This notebook has approx. 80 sheets/160 pages of white, lined FSC-certified paper (80 g/m²) and is equipped with an elastic closure, a bound spine, pen loop and reading ribbon. Meas. 14,5 x 1,5 x 21 cm. 280 g.

3891

BambooPlus FSC Notebook A5 - Inkless Pencil

Environmentally friendly, A5-sized notebook with sturdy bamboo hardcover, equipped with a handy pen loop and closing elastic. The notebook has approximately 80 sheets/160 pages of white, lined, recycled FSC-certified paper (80 g/m²). This notebook comes with a sustainable bamboo pencil with a cap. This pencil has a graphite point with a writing length of up to approx. 20,000 metres. It writes like a traditional pencil and can be erased. The tip does not need to be sharpened and wears very slowly, making the pencil last up to 100 times longer than a traditional pencil. A perfect, long-lasting combination for note-taking. Meas. 13 x 1,5 x 18,5 cm. Each item supplied with an individual kraft sleeve. 320 g.

.40

W099

Notebook made from Stonewaste-Bamboo A6

A6-notebook made from stone waste with a bamboo cover. The recycled, 72 sheets/144 pages of lined paper (120 g/m²) of this booklet are made from 80% stone waste with a little resin (HDPE) to bind the stone powder. Rock paper is a sustainable alternative to ordinary paper because far fewer raw materials are used in its production: no trees, no water, no bleach and no chemicals. The cover made of bamboo wood is many times more durable than regular wood. With a strong spiral bound. Meas. 10 x 2 x 16,5 cm. Each item is supplied in an individual brown cardboard box. 200 g.

MOYU

A world full of greenery

The mission of the MOYU brand is to produce notebooks but without single use paper, without paper waste and without deforestation. Believing in a world without deforestation, MOYU makes notebooks from erasable stone paper. This paper protects trees, the water supply and does not require the use of bleach. Stone paper is also rewritable upto 500 times, making this product highly recyclable.

MOYU branded A5 erasable notebook made from stone paper. With bendable 400 grams soft cover. This notebook includes a pen and cleaning cloth. Each stone paper page is sustainably produced, naturally tree-free and 100% recyclable. This notebook, with an elastic pen loop, is bound in a strong wire-o binding and has 18 pages lined paper, blank paper. Take down notes with the accompanying, special MOYU pen. This pen contains the original Frixion ink. This special ink dries completely on stone paper and is easy to erase without leaving a trace. Slightly moisten the supplied MOYU cloth with some water and erase the ink. This way, pages remain empty for new ideas and to-do lists. You can write on rock paper 500 times on average. This notebook will last you for years.

When ordering 50 pieces or more, you can select to have the inside and/or outside cover printed with your own full colour design. Meas. 20,9 x 15,5 x 1 cm. 156 g.

6490

Quest Portfolio RPET A4

Modern A4 conference/document folder made from RPET material (recycled PET bottles). Supplied with a number of handy pockets as well as a separate compartment for storing a mobile phone. A pen loop is also included. The folder includes a pad with 20 sheets of lined paper (70 g/m²). A sustainable and environmentally friendly product. Meas. 24 x 3 x 31 cm. 520 g.

Digiprint GRS Recycled Pen

Ballpoint pen with blue ink pen made from recycled ABS. The clip/push button of this pen has a striking colour accent and offers space for a generous, digital full-colour print. GRS certified. Total recycled material: 85%. Meas. Ø 1 x 14 cm. 7.4 g.

1815

Vista GRS Recycled ABS

Blue ink ballpoint pen made from recycled ABS. With a unique design: the barrel and clip of this pen is designed in one piece. With colourful accent under the optical 'floating' clip.

GRS certified. Total recycled material: 75%. Meas. Ø 1,1 x 14,2 cm. 7 g.

2694

Post Consumer Recycled Pen Colour

Eco-friendly, blue ink ballpoint pen made from 85% post-consumer recycled ABS from household appliances. The recycled plastic is sorted and processed into a new manufacturable raw material. This saves approximately 70% of energy consumption compared to the regular production of new plastic. In addition, this contributes to the reduction of single use plastic. This pen is printed with the recycling symbol as standard and is supplied with a blue ink refill. Meas. Ø 1,3 x 14 cm. 6,3 g.

2698

Post Consumer Recycled Pen

Eco-friendly, blue ink ballpoint pen made from 85% post-consumer recycled ABS from household appliances. The recycled plastic is sorted and processed into a new manufacturable raw material. This saves approximately 70% of energy consumption compared to the regular production of new plastic. In addition, this contributes to the reduction of single use plastic. This pen is printed with the recycling symbol as standard and is supplied with a blue ink refill. Meas. Ø 1,3 x 14 cm. 6,3 g.

3670

Athos Solid GRS Recycled ABS

Durable, blue ink ballpoint pen. The solid holder is made from recycled ABS. With push button, metal clip and silver coloured accents. GRS certified. Total recycled material: 53%.

Meas. Ø 1,1 x 14,1 cm. 12,2 g.

3671

Athos Trans GRS Recycled ABS

Durable, blue ink ballpoint pen. The transparent coloured holder is made from recycled ABS. With push button, metal clip and silver coloured accents. GRS certified. Total recycled material: 53%.

Meas. Ø 1,1 x 14,1 cm. 12,2 g.

2484

.44

Recycled aluminium

The sustainability of recycled aluminium

Recycled aluminium is made from used aluminium products such as soft drink cans or aluminium packaging. Instead of mining and processing new aluminium ore, these old aluminium products are collected and remelted to create new aluminium products. This means you can now find promotional products such as water bottles and pens.

By using recycled aluminium, fewer new raw materials are used. This means less energy consumption, less use of water and reduction of CO2 emissions.

.10 .30 .31 .50 .60 .70 .90 .98

2316

Brady Soft Touch Recycled Alu

Blue ink ballpoint pen made from recycled aluminium. This pen has a barrel finished with a beautiful powder coating, sturdy metal clip, plastic tip and push button. Meas. Ø 1 x 13,5 cm. 18 g.

Sproutworld: The world's only plantable pencils

Sproutworld tells the story of how sustainable change can be made through small innovations. Sproutworld makes a difference by making everyday products, such as pencils and pens, sustainable and giving them a second life in the form of flowers and herbs. These pencils, from the Sproutworld collection, are 100% sustainable and safe and have a green message to create environmental awareness.

The Sproutworld collection is produced according to the highest achievable ecological and social standards of Bcorp.

W367

made in
Europe

Sproutworld Sharpened Pencil

100% sustainable Sproutworld pencil with a message for a greener planet. This sharpened point pencil is made from wood. Attached to the end of the pencil is a capsule (made from cellulose) which contains seeds. Once the pencil has become too small to use, plant the pencil along with the capsule into some soil. After 2-3 weeks, the seeds germinate and grow into beautiful flowers or fragrant herbs. Choose from sunflowers, forget-me-nots, arugula or basil. The name of the chosen plant will be engraved onto the pencil. The pencil contains no lead and is therefore completely safe. Made in Europe. Meas. Ø 0.73 x 18.5 cm. 4,3 g.

W368

made in
Europe

Sproutworld Unsharpened Pencil

100% sustainable Sproutworld pencil with a message for a greener planet. This unsharpened pencil is made from wood. Attached to the end of the pencil is a capsule (made from cellulose) which contains seeds. Once the pencil has become too small to use, plant the pencil along with the capsule into some soil. After 2-3 weeks, the seeds germinate and grow into beautiful flowers or fragrant herbs. Choose from sunflowers, forget-me-nots, arugula or basil. The name of the chosen plant will be engraved onto the pencil. The pencil contains no lead and is therefore completely safe. Made in Europe. Meas. Ø 0.73 x 18.5 cm. 4,3 g.
